Essen, Germany. Evonik released its newest edition of the US Crop Report which has been integrated into AMINODat® 6.2, the world's most comprehensive animal nutrition database. The US Crop Report provides state-specific data for corn and soybean meal, exclusively from the US, and marks a significant enhancement of Evonik's service offerings in animal nutrition.

Integrated into Evonik's AMINODat® 6.2 database, the 2023 US Crop Report is an essential resource for customers in the animal feed industry, demonstrating Evonik's commitment to deliver key feed quality services.

"The release of this report is not just about numbers and data; it is about the trends and variables affecting the crops that are the lifeblood of our industry. Every sample analyzed and every trend identified represents a collective effort between Evonik and our customers. It's the story of partnership and progress," says Victor Naranjo, Regional Technical Director at Evonik's Animal Nutrition business line.

AMINODat® 6.2, published in January, has become the most comprehensive animal nutrition database in the world. By providing access to over 600,000 feed ingredient samples and 31 million analytical results, AMINODat® 6.2 serves as a powerful tool for optimizing feed formulations and enhancing quality control, ensuring the well-being and performance of animals.

The 2023 US Crop Report demonstrates the collaborative relationship between Evonik and its customers. It requires a
