

Evonik sponsors new feed mill at Nong Lam University in Vietnam

September 13, 2018

A state-of-the-art feed mill for production of pelleted trial feeds has been built at Nong Lam University, Vietnam as part of a scientific collaboration with feed additive specialist company Evonik. The new facility promises to enhance research into animal nutrition and sustainable feed production, and to support student training.

“We are very excited about this new partnership with the Faculty of Animal Science and Veterinary Medicine at Nong Lam University,” said Detlef Bunzel, Head of Applied Feed Technology, Evonik Nutrition & Care GmbH. “Together, we will be able to improve the quality of research into nutritional concepts, feed technology and new products, and thus foster growth of the local industry.”

Located at the University campus in Ho Chi Minh City, the facility will produce mash feed for research trials and is designed for handling various small batches while minimizing cross-contamination. As well as providing a basis for better research, the feed mill will also be an important teaching resource.

“The collaboration with Evonik will put us at the forefront of animal nutrition research in Vietnam,” said Professor Nguyen Hay, President of Nong Lam University. “The company’s global R&D expertise complements our existing capabilities and together we can drive more innovative solutions for the future.

Understanding the processes of feed production is crucial for our students, so the new feed mill will be an invaluable training tool to improve their technical knowledge and our national industry.”

Vietnam is an important and growing market for specialist animal nutrition, driven by an increasing demand for safe and healthier

food, according to Dr Jan–Olaf Barth, Vice President for Evonik Nutrition & Care, Asia South. He emphasized: “We welcome the opportunity to contribute to the development of a sustainable food production value chain through a close partnership with local research institutions and our customers.”

“Good quality animal protein should be accessible, affordable and available to everyone, as part of a healthy human diet. By sharing expertise and resource with academic institutions such as Nong Lam, we can move closer to that vision.”

Company information

Evonik is one of the world leaders in specialty chemicals. The focus on more specialty businesses, customer–orientated innovative prowess and a trustful and performance–oriented corporate culture form the heart of Evonik’s corporate strategy. They are the lever for profitable growth and a sustained increase in the value of the company. Evonik benefits specifically from its customer proximity and leading market positions. Evonik is active in over 100 countries around the world with more than 36,000 employees. In fiscal 2017, the enterprise generated sales of €14.4 billion and an operating profit (adjusted EBITDA) of €2.36 billion.

Evonik Asia Pacific South

Headquartered in Singapore, Evonik is present in the Asia Pacific South region with production sites, sales offices, innovation and technical service centers located in Australia, Bangladesh, India, Indonesia, Malaysia, New Zealand, Pakistan, Philippines, Singapore, Thailand and Vietnam. With more than 1,800 employees in the region, the company steadily grows its footprint in Asia Pacific South by expanding its regional operations in response to the growing demand. Evonik Industries has been establishing customer relationships and importing a broad range of products in the Asia Pacific South region since the 1920’s.
