The Health & Nutrition Business Unit of Evonik Industries, Essen (Germany), has now published the latest edition of its customer magazine AMINONews® for the compound feed and livestock production industries.

In that issue our swine specialist Dr John Htoo addresses the topic “Requirements and optimum dietary branched-chain amino acids to lysine ratios for pigs”.

The other two articles are:

- “Branched-chain amino acids in broiler nutrition”, by Dr Ariane Helmbrecht
- “Roles, metabolisms and antagonisms of branched-chain amino acids in animal nutrition”, by Dr John Htoo and Dr Markus Wiltafsky

Featured as “Research Highlights”, the magazine also reports on current developments and latest scientific publications on amino acids for animal nutrition.

Evonik is the only company in the world that produces and markets all four essential amino acids used in advanced animal nutrition: MetAMINO® (DL-methionine), Biolys® (L-lysine), ThreAMINO® (L-threonine) and TrypAMINO® (L-tryptophan). Mepron®, a rumen-protected DL-methionine and CreAMINO® a creatine source for broilers complete the product range. The company markets innovative products and services in more than one hundred countries and thus makes a valuable contribution to the cost-efficiency of its customers and to healthy and environment-friendly animal nutrition.
