

# CORN SOY REPORT 2017

AMINONIR®

## Dear Customer,

In continuation of a long term commitment to our customers, Evonik Nutrition & Care has compiled a comprehensive report characterizing the amino acids, crude fat, crude fiber, sugar, and ash contents of corn, soybean meal, and corn-based dried distillers grains with solubles (DDGS) for 2017. The data presented for corn and soybean meal are representative of the current U.S. crops and are segmented by region.

The 2017 soybean meal crop has a relatively low crude protein value, at 46.1 %, which is consistent with the reduction in crude protein content observed in soybean meal over the last five years. In fact, the soybean meal from the 2017 crop has the lowest crude protein content observed since 2007. For this year's crop, crude protein content across the regions ranges from 45.9 % for the Western Corn Belt to 46.8 % for the Southeast.

Regional differences continue to be notable in this year's corn crop, with crude protein levels ranging from 7.3% for the East Coast to 8.2 % for the Midsouth. Overall, the mean crude protein content of 7.5 % is consistent with the 2016 crop.

Overall DDGS mean crude protein content has slightly increased, at 27.1 %, relative to the previous three years. Statistics from the DDGS data continue to confirm that this is a highly variable ingredient.

While we take the responsibility to generate this report, we feel that what makes it so successful is that it is entirely based on samples collected by our customers and analyzed through Evonik's AMINONIR® laboratory service. By compiling the report as presented, we believe that we can provide information that is pertinent to our customers and their operations, as well as give insight into general trends that are occurring in each year's crops.

Thank you to our customers who participated in the 2017 crop report. Without your participation, this report would not be possible.

We sincerely hope that this report will provide you with valuable information on the nutrition value of the U.S. harvest 2017.

Enjoy the data!

Yours sincerely,

**Ken O'Halloran**

Regional Vice President Animal Nutrition

**AMINONIR®**
